

Shubham Jangra

AWS • Docker • SQL • Advanced Java (DSA) • C • Web Development • Linux • Python | DL & ML

shubhamj00986@gmail.com | +91 9253476893 | [GitHub](#)

PROFILE

Passionate Software Engineering and AI student with hands-on experience building Machine Learning, Deep Learning, and Backend applications. Skilled in Python, Java, SQL, FastAPI, TensorFlow, Docker, and AWS. Strong understanding of Data Structures & Algorithms, OOP, and DBMS, with a focus on developing scalable AI-powered software solutions.

KEY PROJECTS

Disease Prediction System | [GitHub](#)

- Developed a disease prediction system using **Machine Learning and Deep Learning** models.
- Integrated a user-friendly interface.
- Improved prediction accuracy through data preprocessing and feature engineering.

AI Chatbot | [GitHub](#)

- Built an AI chatbot using **Python, API** for intelligent query handling.
- Developed backend APIs for real-time user interaction.
- Optimized response generation for better user experience.

Lung Cancer Prediction System | [GitHub](#)

- Developed a **CNN-based Lung Cancer Prediction System** for medical image classification.
- Applied image preprocessing and data augmentation to improve prediction accuracy.
- Evaluated model performance using standard classification metrics.

Movie Recommendation System | [GitHub](#)

- Built a recommendation engine using **content-based filtering** techniques.
- Processed movie datasets with **Python, Pandas, and Scikit-learn**.
- Generated personalized movie recommendations based on user preferences.

TECHNICAL SKILLS

- Languages:** Python, Advanced Java, SQL, C
- AI/ML:** Machine Learning, Deep Learning, TensorFlow, Scikit-learn, Keras
- Backend:** FastAPI
- Tools:** Git, GitHub, Docker, AWS, VS Code
- Core Concepts:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), DBMS

EDUCATION

Bachelor of Technology (B.Tech) in Artificial Intelligence & Data Science (AI&DS) – Poornima University | Aug 2024 – May 2028 (Expected)
